INTRODUCING

OPATRA DOME

OPATRA DOME Analysis System clinically measures the dermis and epidermis of the skin using RGB visible light, PL polarised light and UV spectrum imaging technology, combines with artificial intelligence and image analysis.

Used by the beauty, medical and aesthetic skincare professionals, the skin analyser system is the world's most advanced skin detection equipment that captures multi-spectral photos of the face, examining the complexion of wrinkles, spots, pores, texture, porphyrins, UV spots, pigmentation, acne, moisture and skin age. According to the test results, Opatra Dome skin analysis system recommends products for customized skin management program and predicting the trend of future skin 3-5 years. When a patient can see tangible evidence of their skin conditions, they are more likely to book a treatment or buy a product immediately to cure their damaged skin.

MARKET COMPARISON

Comparison	Skin Analyzer + Computer	Skin Analyzer + IPAD	Opatra DOME
Spectrum	RGB+UV	RGB+UV+PL	RGB+UV +PL
Working mode	Requires additional computer cable connection	Need to purchase a specific type of IPAD	Together with professional tablet, no need buy more
